

Course title

Get Started with WhatsUp Gold Administration

Duration

Equivalent to 8 hours of learning

Audience

WhatsUp Gold administrators

Description

The Get Started with WhatsUp Gold Administration course introduces Progress WhatsUp Gold for administrators. This course provides a foundation for network administrators and IT operations professionals to be able to configure, discover, and manage their networks. Students will also learn about the basic functionality included with WhatsUp Gold for monitoring their network, creating actions and alerts in response to device conditions, and generating reports based on their network.

The materials that you receive with this course include a Course Guide and an Exercise Guide, which includes hands-on exercises.

Version compatibility

This course is compatible with Progress WhatsUp Gold 21.

What you will learn

After taking this course, you should be able to:

- Apply credentials and discover devices on your network.
- Add monitors for your devices.
- Create email notifications in response to network events.
- Use dashboards to visualize your network and produce reports.
- Add users to WhatsUp Gold

Prerequisites

Students must have WhatsUp Gold installed on their network.
